COMMENTS FROM THE TOWN MANAGER'S OFFICE

Owners and keepers of dogs are required by law to license their canine pets on or before April 1st. The Town Clerk is now issuing licenses as the 1962 blanks and tags have been received from the State Department of Agriculture.

Dogs that have not reached the age of six months on April 1st need not be licensed until 1963. The tax is \$5.40 for females and \$1.40 for males or spayed females.

To be eligible to the \$1.40 spayed fee, female dogs licensed for the first time under that category must be spayed on or before April 1st and a prescribed certificate issued by the Commissioner of Agriculture and signed by a licensed veterinarian must be submitted. Or, if the spayed dog has been previously registered, copy of the license containing required spaying information is acceptable.

It is suggested that when convenient, owner's copy of previous license for male or female dog also be presented, to facilitate issuing current license and especially so when children or some person other than the owner makes application in order that all the required information will be available.

In due time reminder notices will be mailed to those that are delinquent in licensing their dog.

The Selectmen have appointed the following to the Fire Station Study Committee to serve with the Town Manager and Fire Chief: Stephen L. Jacobs, Carroll Valentine, Robert Blake, Michael Stowell, and Robert D. Hastings.

Sincerely,
Harold L. Bean

THOMPSON CHAIRMAN BETHEL SCHOOL COMM.

Richard Thompson was elected chairman of the Superintendent's School Committee at its first meeting Monday night. The new five member committee also elected Barbara Greenleaf Internal Secretary and Ted Chadbourne External Secretary.

Eric Sahlberg, Superintendent of Schools, briefed the Committee on the status of several matters initiated by the previous Committee. It was pointed out that Bethel moved from 25th to 22nd place among 53 schools in its class in teachers' salaries for the current year. (This class includes Maine towns with a population of 1000 to 2999, not maintaining a high school.) This advance was due to special increases given to selected teachers last year.

A correction was made regarding the training of Ethel Bisbee, which had been listed as one year in the town report. Mrs. Bisbee has two years training and has completed 97 percent of the third year's work.

As the first item of new business the Committee voted to keep a copy of the minutes of its meetings in the office of the Town Manager, in addition to the copy in the Superintendent's office. This is for the convenience of the general public, to whom the meetings, minutes, and contracts are open.

GOVERNOR REED OPENS EASTER SEAL CAMPAIGN

"Fight with Them Against Crippling" This was the slogan for the 1962 Easter Seal campaign as Governor John H. Reed opened the drive by purchasing the first sheet of seals. In purchasing the seals the Governor said, "It gives me tremendous pleasure to participate in the 1962 Easter Seal campaign through the purchase of Easter Seals. I trust all citizens of the state will support the worthwhile efforts of the Pine Tree Society on behalf of the handicapped children and adults in Maine."

The Pine Tree Society for Crippled Children and Adults is the official Easter Seal Agency in Maine. During the month preceding Easter it carries out its annual fund raising drive as other Easter Seal agencies do throughout the country. The traditional Easter Seals are a symbol of hope to the crippled children and adults who are helped by their purchase and use. Funds raised by the Society are used to support the rehabilitation programs of direct care to patients at the Hyde Rehabilitation Center at Bath and a summer program of therapy and recreational activities for crippled children at the Pine Tree Camp in Rome.

The Pine Tree Society and its facilities are a uniquely Maine organization. Ninety percent of all funds raised during the Easter Seal campaign remain in the state to help restore to handicapped children and adults maximum use of their physical potentials.

Gould Academy Carnival Queen

Miss Claudia DeMonte

In an impressive outdoor ceremony, Gould Academy's Headmaster, Edmond J. Vachon, crowned this year's Carnival Queen, Miss Claudia DeMonte. Claudia is the daughter of Mrs. Edna Curtis of Bethel.

In her four years at Gould she has participated in many school activities. Some are as follows: Student Council 4; Girls' A. A. Council, 2, 3, 4 (president 4); Athletic Council 4; Cheerleader 2, 3, 4 (head cheerleader 4); Glee Club; Christmas Vespers 1; Plays 4; French Club, 3, 4; D. A. R. Representative 4.

SUNDAY RIVER FAMILY RACE THIS WEEK END

Sunday, March 25, the Sunday River Family Punch Bowl Relay will be held on the entire length of the Lazy River Trail. Teams will consist of four members of the immediate family and must include at least one female and at least two members under 18 years of age. Each member of a family will run one of the four trail sections, passing a baton within designated areas. Because this is definitely a fun race for the average family skier, no Class A or B racers will be eligible. The race referee, Uel Gardner, will reserve the right to make changes in the rules up to an hour before the start of the race.

This past week and Sunday River once again broke all attendance records. The snow cover is exceptionally good for this time of year, and spring skiing should continue well into April.

Due to an unexpected volume of advertising this week, it has been necessary to omit several late contributions of news.

Week after week carefully
tabulated figures published
in "Automotive Market Reports"
show that Chevrolet trucks are
worth more in resale value.

why?

If you were a professional used truck
buyer, why would you pay more for
one make than another?

There may be several reasons, but
among them would be:

1. A greater demand for the
product

2. A more desirable product for
resale

So if used Chevrolet trucks con-
sistently bring higher prices at auc-
tions all over the country, it means that
their quality features pay off for you
not only as long as you own them
but also when you are ready to trade
them—double-wall cabs, doors and
side panels, roof insulation, select
wood floors, reliable and economical
engines, real rugged tailgates, a sus-
pension system that helps prolong
truck life.

See your Chevrolet dealer for a
quality '62 Chevrolet Jobmaster truck.

"Automotive Market Reports" is a weekly au-
thoritative wholesale publication which reports the
average prices paid for used trucks and cars by
professional buyers at auctions all over the U.S.

Shell dealers suggest 7 things to try if your car won't start

ANY TIME you have trouble getting your engine going, the first thing to do is check the obvious.

For example, the fuel gauge. It's astonishing how often an empty fuel tank is all that keeps the engine from starting.

According to American Automobile Association figures, motorists run out of fuel more than 5,000 times per day.

If you have an automatic transmission, make sure your selector is in the correct position for starting.

Next step is to run through these seven tips from Shell dealers. Any one of them could help you get started.

1 Use the starter in short bursts. A long, steady grinding runs your battery down drastically. In fact, if the car won't start in the first few attempts, it's a good idea to wait several minutes before trying again. This lets the battery recover some of its life.

2 If you have a manual shift, keep the clutch pressed all the way down when you're starting. This helps to take some of the strain off the battery, particularly in cold weather.

NOTE: An engine in good mechanical condition should usually start in 3 or 4 seconds. Today's Super Shell gasoline can help. During coldest months, it contains an extra dose of Butane, a special quick-start ingredient.

3 Keep the battery connectors tight. If battery terminal connectors are loose, you may not get full battery voltage, when you try to start. With reduced voltage, the engine is harder to start. Sometimes the starter won't even turn the engine. It's easy to keep connectors tight.

All you need is a suitable wrench. Even a pair of pliers will do.

If you have repeated starting troubles, your battery may be weak. Your Shell dealer can recharge it—or install a new one if needed.

4 Get maximum value from your choke. If you have an automatic choke, give the accelerator pedal a tap before you start. This sets the choke in the correct position—the way it should be for easy starting. **NOTE:** A small choke adjustment can often cure cold weather starting troubles. Your Shell dealer can do it for you.

If you have a manual choke, remember to use it! When you pull the choke out, you increase the proportion of fuel in the air-fuel mixture. Could be all your engine needs for a start, especially on a cold morning. After you've started and warmed up, be sure to push the choke all the way back in.

5 Wipe moisture off the distributor, ignition leads and spark plugs. Condensed moisture—which can be a problem in cars left out overnight—could keep you from getting started. It's easy to find the distributor. Just follow the ignition leads—the wires that come from the spark plugs. They lead right to the distributor. Before you wipe the moisture away, make sure the ignition is turned off and nobody works the starter.

6 Turn off the lights, radio, heater, heater fan. This way there are no extra demands on the battery. It can devote its full power to starting the engine. **NOTE:** Don't forget to turn lights on again when you start up.

7 Never pump the accelerator if you suspect flooding. It only makes the flooding worse. Instead, try this: Wait 2 or 3 minutes. Then press the accelerator to the floor once and hold it there while the starter cranks the engine. When the engine does start, gradually let the accelerator return to idle position.

Here are the 9 ingredients in Super Shell—and what they do to give your car top performance

- #1 is Butane for quick starts. Butane is so eager to get going it could even boil on ice.
- #2 is Pentane mix for fast warm-ups.
- #3 is anti-knock mix to resist all kinds of knocks.
- #4 is gum preventive to help keep carburetors clean inside.
- #5 is TCP* for power, mileage, and longer plug life.
- #6 is "cat-cracked" gasoline for power.
- #7 is an "anti-icer" added in cold weather to help check carburetor icing stalls.
- #8 is Alkylate to help control "high-speed knock."
- #9 is Platformate for extra mileage.

*Trademark for Shell's unique gasoline additive. Gasoline containing TCP is covered by U. S. Patent 2,892,117.

Regardless of who may be right or who may be wrong in a driving situation, safety demands that the man behind the wheel keep a firm grip upon his emotions. No one who is driving a car can afford to indulge in fits of temper. The Maine Highway Safety Committee reminds us that we must never allow anything to upset our driving poise. If we do, little annoyances can blossom into big troubles.
